## Result of running "servertask" on the command line

This is the settings on the "Configuration" tab of the Conquest server.

This is the settings on the "Known DICOM providers" tab of the Conquest server.

```
/* ****************************************************************
 *                                                              *
 * DICOM AE (Application entity) -> IP address / Port map       *
 * (This is file ACRNEMA.MAP)                                   *
 *                                                              *
 * All DICOM systems that want to retrieve images from the      *
 * Conquest DICOM server must be listed here with correct       *
 * AE name, (IP adress or hostname) and port number. The        *
 * first entry is the Conquest server itself. The last ones     *
 * with * show wildcard mechanism. Add new entries above.       *
 *                                                              *
 * The syntax for each entry is :                               *
 *    AE    <IP adress|Host name>    port number    compression *
 *                                                              *
 * For compression see manual. Values are un=uncompressed;      *
 * ul=littleendianexplicit,ub=bigendianexplicit,ue=both         *
 * j2=lossless jpeg;j3..j6=lossy jpeg;n1..n4=nki private        *
 * js  =lossless jpegLS;  j7=lossy jpegLS                       *
 * jk  =lossless jpeg2000;jl=lossy jpeg2000                     *
 * J3NN..j6NN, JLNN or J7NN overrides quality factor to NN%     *
 *                                                              *
